

## Short biography

### **Annie Christianus**

Dip in Fisheries Science, BSc in Fisheries, PhD (UPM)

Dr Annie Christianus's primary research interest is in the field of fish reproductive biology, with focus on hatchery technology to improve production of fish seedlings. Her current work is on exotic species which are difficult to reproduce in captive condition, requiring the application of hormonal induce breeding technique. She is also involved in the research on horseshoe crab, an ancient invertebrate species, and as advisory member for ERDG (Ecological & Research Development Group), a non-profit wildlife conservation organization based in USA.
