

## Short biography

### **Chong Chou Min**

BSc (Biology, UPM), PhD (Immunology, UPM)

Dr Chong Chou Min's primary research interest is fish and shellfish immunology. His research in Universiti Putra Malaysia focuses on the production of monoclonal antibodies and aptamers against leukocytes in tropical aquaculture fish and shellfish species. He is also working on development of immunoprophylactic and therapeutic pellets for aquaculture. His team is currently integrating Raman Spectroscopy in selecting the disease resistant and fast-growing aquaculture broodstock. He is the Honorary Treasurer of Malaysian Fisheries society, the committee member of Malaysian Aquaculture Development Association, and an active member of the Asian Fisheries Society.
